development application through testing

Storybook

environment for developing a library of UI

Git

application version control system

Material-UI

library of components for the UI

HTML5

document markup language

CSS3

document style language

SCSS / SASS

CSS-based metalanguage

English

A2 in progress

ABOUT ME

I'm a frontend developer with experience developing the visible part of web applications. The main technologies of my work are React, Redux and TypeScript. Every day I improve my skills in this direction and plan to expand them with new technologies, such as React Native and Angular. I'm always open to offers. Tell me more about your needs.

EXPERIENCE

Since 2022 / Frontend developer / Part-time

- organization of flux architecture;
- organization of architectural solutions (UI, BLL, DAL);
- development of web applications;
- development of components;
- development of tests;
- search and correction of errors in the code;
- transfer of class components to functional ones;
- translation of the application from JS to TS;
- improving application performance;
- work with the server (CRUD operations);
- application deployment.

My projects as frontend developer:

- **LEARNING CARDS** - An application to learn anything
stack: React, Redux Toolkit, TS, Axios, Formik, MUI, SASS
- **TODOLIST** - Task manager
stack: React, Redux Toolkit, TS, Axios, Formik, MUI, TDD
- **SOCIAL NETWORK** - Online platform for communication
stack: React, Redux, TS, Axios, Redux-form

EDUCATION

2022 / IT-INCUBATOR /

Frontend developer (React, Redux, TS, JS, Rest API, TDD)

2009 - 2015 / A.D.Sakharov ISEU /

Nuclear and radiation safety engineer
