environment for developing a library of UI

Git
application version control system

Material-UI
library of components for the UI

HTML5
document markup language

CSS3
document style language

SCSS / SASS
CSS-based metalanguage

English
A2 in progress

ABOUT ME

I'm a frontend developer with experience developing the visible part of web applications. The main technologies of my work are React, Redux and TypeScript. Every day I improve my skills in this direction and plan to expand them with new technologies, such as React Native and Angular. I'm always open to offers. Tell me more about your needs.

EXPERIENCE

Since 05.2022 / Frontend developer / Part-time

- organization of architectural solutions (UI, BLL, DAL);
- development of web applications, tests;
- search and correction of errors in the code;
- transfer of class components to functional, from JS to TS;
- improving application performance;
- work with the server (CRUD operations).

My projects as frontend developer:
- LEARNING CARDS - Application for learning something
  stack: React, Redux Toolkit, TS, Axios, Formik, MUI, SASS
- TODOLIST - Task manager
  stack: React, Redux Toolkit, TS, Axios, Formik, MUI, TDD
- SOCIAL NETWORK - Online platform for communication
  stack: React, Redux, TS, Axios, Redux-form

03.2019 - 01.2023 / Head of design sector / Full-time

- monitoring the work of employees and setting tasks;
- development of a design standard in the company;
- development of the TS section of design documentation for retail facilities using AutoCAD software;
- work with technical legal documentation;
- interaction with customers and equipment suppliers;
- passing state examinations.

EDUCATION

2022 / IT-INCUBATOR /
Frontend developer (React, Redux, TS, JS, Rest API, TDD)
2009 - 2015 / A.D.Sakharov ISEU /
Nuclear and radiation safety engineer
